

The flourishing economy as well as the population growth leads to a steadily increasing traffic load on the Swiss road network. This is also reflected in the congestion statistics of FEDRO (Federal Roads Office). For the Raben Sieber truck fleet, the challenging traffic congestion has direct effects, such as:

- Significant loss of productivity due to vehicles stuck in traffic jams
- Inclusion of larger time margins for fixed delivery dates
- Higher fuel consumption due to increased stop-and-go traffic

For these reasons, the Raben Sieber Group charges an industry-standard congestion surcharge for the additional costs incurred. The congestion hours are determined by Viasuisse AG on behalf of the Federal Roads Office FEDRO and published annually in the annual report "Traffic Development and Availability of National Roads". Viasuisse will provide the congestion hours on a monthly basis. The Raben Sieber Group will update and invoice the congestion surcharge consequently on a monthly basis.

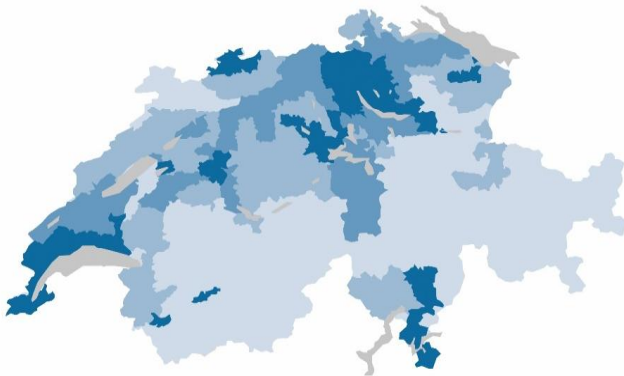

Calculation of the congestion index

- The basis for the calculation is the sum of the congestion hours over the last 12 months (rolling calculation).
- The congestion surcharge is adjusted and published monthly.
- The lower limit of the congestion zone of 0% will not be undercut.

Congestion zone matrix billing month June 2025

	Zone 1	Zone 2	Zone 3	Zone 4
Zone 1	3.40% *	6.25%	6.75%	7.25%
Zone 2	6.25%	6.75%	7.25%	7.75%
Zone 3	6.75%	7.25%	7.75%	8.25%
Zone 4	7.25%	7.75%	8.25%	8.75%

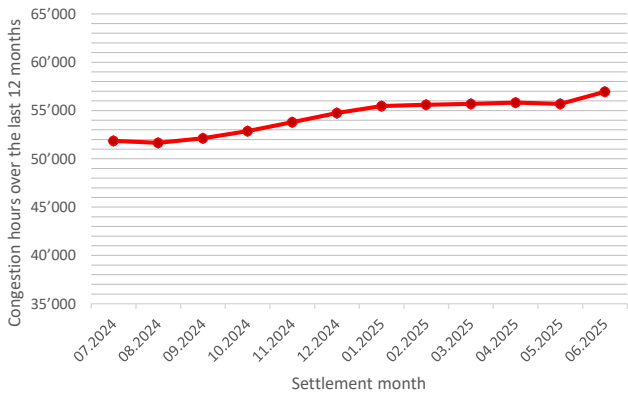

\* Route zone 1 / zone 1 corresponds to 50% of the congestion surcharge for the route zone 2 / zone 2

little congestion medium congestion much congestion considerable congestion

The congestion zones are defined based on postcodes. The more transparent the colour, the deeper the dust load in the corresponding area.

Development of congestion hours

Billing month	Congestion hours month <sup>1)</sup>	Monthly congestion hours	Congestion hours last 12 mths <sup>1)</sup>
07.2024	05.2024	5'659	51'852 <sup>2)</sup>
08.2024	06.2024	4'737	51'658
09.2024	07.2024	4'452	52'127
10.2024	08.2024	5'122	52'873
11.2024	09.2024	5'997	53'794
12.2024	10.2024	5'295	54'745
01.2025	11.2024	4'932	55'452
02.2025	12.2024	3'661	55'591
03.2025	01.2025	3'329	55'696
04.2025	02.2025	3'611	55'815
05.2025	03.2025	4'475	55'686
06.2025	04.2025	5'672	56'942

The monthly congestion hours are determined by Viasuisse AG and made available to FEDRO (Federal Roads Office). FEDRO publishes the monthly congestion hours on its website. Every year, these congestion hours are also published by FEDRO in the annual report "Traffic development and availability of national roads".

The congestion hours are published monthly by FEDRO and are relevant for the billing in the month after next.

Example: The rolling congestion hours from May 2024 to April 2025 are relevant for the congestion surcharge in June 2025
